FOREWORD

In a bid to improve delivery of services to all citizens the Government of Uganda introduced a decentralization policy under the Constitution of 1995 and the Local Government Act Cap 243. Under the decentralization policy, LGs are mandated to deliver a wide range of basic services and the Ministries, Departments and Agencies to provide standards, guidelines as well as supervisory support. To finance the delivery of basic services, the central government makes transfers to LGs.

Following a series of reviews conducted on the country's fiscal decentralization reforms, with support from the World Bank, in FY 2015/16 GoU took measures to revise its LG transfers system under the Uganda Intergovernmental Fiscal Transfer Reform. The core program objectives include; i) Restoring adequacy in financing of decentralized service delivery; ii) Ensuring equity in allocation of funds to LGs for service delivery; and iii) Improving the efficiency of LGs in the delivery of services.

The Local Government Performance Assessment system is aimed at attaining the third objective of the Intergovernmental Fiscal Transfer Reform. This revised manual sets out a performance and improvement framework with more outcome driven indicators also associated with an incentive system to ensure improved institutional and service delivery performance of Local Governments.

The manual has been jointly developed by relevant Ministries, Departments and Agencies(MDAs) in close consultation with local Governments. It provides detailed information and guidelines on the objectives, processes, organization and management of the Performance system to be applied including activities prior to, during and after assessment.

I trust that this manual will be efficiently utilized in order to contribute to efforts to improve LG performance and service delivery. I also encourage Local Governments to embrace this manual as a key tool to not only prepare for the assessment process but also use it as a basis for continuous improvements in the execution of their mandated roles and responsibilities.

Finally, I would like to take his opportunity to thank all representatives from the various MDAs and LGs that made compilation of this manual possible. These include; Ministry of Finance Planning and Economic Development; Ministry of Local Government; Local Government Finance Commission; Ministry of Education and Sports; Ministry of Health; Ministry of Agriculture, Animal Industry and Fisheries; Ministry of Water and Environment; Ministry of Public Service; National Environment Management Authority and Local Governments.

My office also acknowledges the technical and financial support received through the Overseas Development Institute-Budget Strengthening Initiative (ODI-BSI) and the World Bank. I look forward to further collaboration with all stakeholders in improving service delivery in the country.

For God and my Country.

Kaima Godfrey

SECTION 1: INTRODUCTION

1 Background to Management of Service Delivery Assessments

The Government of Uganda (GoU) is implementing the decentralization policy where: (i) the Local Governments (LGs) have the primary mandate of providing front line services in most basic services areas; and (ii) Central Government provides guidance through sector policies, standards, sector budget guidelines, technical supervision and support. In order to implement their service delivery mandates, Government has been transferring resources to Local Governments since 1993/94 where the funding, which was UGX 0.79 trillion (in UGX 2019/20 terms), has increased to UGX 3.81 trillion in FY 2019/20. The increase notwithstanding, there are a number of challenges notably: the limited discretion for LGs to decide on allocations of resources; visible inequities in the allocation of resources across LGs; lack of incentives for LGs to account for resources; and reduced real per capita value of transfers. Therefore, Government designed and has been implementing Intergovernmental Fiscal Transfer Reforms since 2015.

One of the key elements of the intergovernmental fiscal transfer reforms was the design and implementation of the Local Government Performance Assessment (LG PA) system under the leadership of the Office of the Prime Minister (OPM). The LG PA which has been focusing on: (i) accountability requirements; and (ii) crosscutting and sector (education, health and water) functional processes and systems, focusing on areas which were impediment for effective service delivery and bottlenecks in organization, administration and execution, has been conducted for three years where indicators were kept stable, also to ensure performance-trend analysis. The performance assessment results were used in the allocation of development grants in FYs 2019/20 and 2020/21 as well as in the design and implementation of Local Government Performance Improvement Plans (LG PIPs). The implementation of the assessment has led to improvement in the management of resources for service delivery as depicted in the improvement of LGs performance assessment results. For example, the overall average scores improved from 56% in the assessment conducted in 2017 to 68% in the assessment conducted in 2019.

The foregoing performance improvements notwithstanding, Government has noted that to address the existing constraints to the delivery of sufficient and quality services to citizens requires not only increased adequacy and equity of transfers but also strengthened: (i) Central Government oversight and support; (ii) capacity of Local Governments in the management of services; and (iii) service delivery performance at the facility level. In addition, after 3 years of implementation there is need to refine some of the indicators and up-date them based on lessons learned, e.g. removing indicators which are now largely complied with, and introducing new ones focusing on emerging challenges. Therefore, a new performance assessment and improvement framework to incentivize improved management and delivery of services has been developed under the coordination of OPM as depicted in the table below:

Overview of the Revised Performance Assessment and Improvement Framework

This Assessment Manual focuses on Level 2 which is Local Government Management of Service Delivery.

2 Background to Assessment of LG Management of Service Delivery

2.1 Scope of the LG Management of Service Delivery Assessment

The assessment of Local Government Management of Service Delivery has two elements:

- a) **Minimum conditions** (seen as core performance indicators) which focusses on key bottlenecks for service delivery and safeguards management.
- b) **Performance measures**, which are sectoral assessments, will be used to evaluate service delivery in the Districts/Municipalities as a whole, and for some areas aggregating performance information from facilities and Lower Local Governments (LLGs) and assessing compliance with performance reporting and improvement support.

The Minimum Conditions (MCs) and Performance Measures (PMs) were harmonized across the different assessment areas – see section 3. Below is a summary of the MCs and PMs.

2.2 Principles for the design of the assessment system

The selection and formulation of the minimum conditions and performance measures have been done using a number of core design principles for design of LG performance assessment systems. These are outlined below:

- a) Attribution of performance measures covering areas where the efforts of the LGs matter (i.e. the LGs are able to improve performance on the selected measure):
- b) Address identified core blockages to service delivery:
- c) Ensure credibility and neutrality of the assessment process
- d) Ensure effective and timely administration of rewards and sanctions:
- e) Cost-effectiveness in assessing the measures and aimed to provide sustainability in LG management and operations (value for money)

2.3 Overview of Minimum Conditions

The aspects assessed under minimum conditions include:

- a) For crosscutting:
 - Human Resource Management and Development
 - Safeguards:
 - o Fiduciary safeguards (Financial management and reporting)
 - o Environmental and Social requirements
- b) For Education, Health and Water and Micro-Scale Irrigation:
 - Human Resource Management and Development
 - Environmental and Social requirements

2.4 Overview of Performance Measures and Relative Scores

The Performance Measures to be assessed are summarised below and are elaborated in sections 8 – 12 of this Manual.

SECTION 2: ASSESSING LG MANAGEMENT OF SERVICE DELIVERY

3 Preparatory Activities

3.1 Orientation of the Local Governments

To ensure that the LGs are sufficiently prepared for the assessment, the following activities will be undertaken before the actual performance assessment is conducted:

- a) The Performance Assessment Manual will be printed and distributed to all LGs.
- b) The LG Performance Assessment Task Force will inform, orient and train LGs on the PA Manual as well as the implications of their performance scores prior to the actual assessments.
- c) The respective MDAs will provide support to the LGs in preparation for the assessments as part of their inspection, support supervision and mentoring mandates.
- d) LGs shall prepare for the assessments in advance. This will involve conducting internal 'mock' assessments to determine the extent to which they have complied with the minimum conditions and expected performance. In case there are some gaps, these should be addressed before the assessment. LGs shall collect and have ready all documents required at the point of time for the assessment. Evidence, which is not available during the assessment/field-work, will not be considered in the scoring of performance of a LG (i.e. a LG will not receive marks on these).
- e) The LGs will be informed about the assessment schedules prior to arrival of the assessment teams.
- f) The sampled LGs will also be informed about visits by any quality assurance teams, which may review the quality of the process and results of the assessment and should be available for this.

3.2 Team Composition and Coordination

The LG PA of the Districts and Municipalities will be conducted by external independent teams, which will be contracted to perform the exercise in a quality and credible manner. The teams shall be mobilized and undergo training before the assessment every year.

The Local Governments will be assessed in four (4) clusters. Each cluster will have:

- a) One (1) overall Team Leader who will also serve as an Internal Quality Assurance Person
- b) Three (3) sub- teams of eight (8) consultants each, to ensure timely implementation within each cluster. Each sub-team will nominate a sub-team leader from amongst the Assessors who will ensure compliance to the assessment process as well as comprehensive and quality reporting. The compositions of the sub-teams and indicative activities during the performance assessment exercise is summarized in the table below:

Indicative compositions of the sub-teams and activities

¹ This expert will also cover the few issues on governance/transparency which are cross-cutting.

3.3 Training of the LG PA and QA teams

The LG Performance Assessment Task Force will conduct a comprehensive training of both the assessment and Independent Verification teams before the assessment is conducted. The objective of the training will be to ensure that all team members have internalized the performance assessment manual, including the rationale behind the process, the scoring and means of verification of the performance measures. One of the elements that will be emphasized is the need for maintaining credibility of the assessment systems and team members will therefore be required to sign the Code of Ethics for the assessment. During the training, understanding of the task will be harmonized and data collection templates further refined and check lists for assessment drawn from the manual will be up-dated and linked with the particular year for assessment.

4 Collection of Data to Inform the Assessment Process

4.1 Collection of data from secondary sources at the national level

To ensure that the assessment system is cost-effective, data regarding performance measures that can be collected from secondary sources will be collected at the national level. The MDAs from which secondary data will be collected are summarized in the table below.

No	Area	MDA to be Visited
1.	LG Planning and Financial Management	- Office of the Auditor General (OAG) - Internal Auditor General - MoFPED
2.	LG Human Resource Management	- MoPS - MoLG
3.	Project Execution	- MoH (Engineering Unit) - MoES (CMU) - MOWT
4.	Environment and social Management	- NEMA - MoGLSD
5.	Health	- MoH
6.	Education	- MoES (DES)
7.	Water Management	- MoWE
8.	Micro-scale irrigation	- MAAIF

The assessment team will compile LG draft reports identifying areas that need to be further clarified during the field-work. This will be done in conjunction with the desk-based collection of information for the review of the compliance with the minimum access conditions. During the training of the assessment teams contact focal points in various MDAs and other agencies will be provided to facilitate data availability.

4.2 Field based LG Performance Assessment

This will take place from September- December every year. The model of the field assessment will involve:

- a) Entry meeting: When commencing the LG-PA in each LG, the Consultant will meet/get in contact with the core management team in each LG and present the full Consultant's team, affirm itinerary and ensure agreement of the LGPA timeline.
- b) Data collection from the District/Municipality and a sample of LLGs and facilities: The respective LGPA team members will visit all participating LGs in their cluster and undertake the assessment process as per the LG PA Manual. The teams are expected to visit and spend two days in each Local Government. The working style of the assessors should be friendly but firm, with opportunities to provide advice to the LGs during the process. If either the individual or documentary evidence is not available by the time of the assessment, then it should be deemed not available.
- c) Debriefing meeting/session to highlight the emerging findings, seek clarifications and give the LG an opportunity to provide more information. The Consultant will strictly use a pre-determined format to present at the debrief, take minutes of the meeting and fill the Exit Form (to be provided) which will be signed by the CAO/TC with comments from the LG.
- d) Compiling of the LG Performance Assessment Reports which will be a detailed report per LG, consolidating performance findings and scores from both the desk-based review and field work. Each assessor shall compile the findings and up-load in the Online Performance Assessment Management System (OPAMs) not later than 2 days after the assessment of each LG.
- e) Each contracted firm must have an Internal Quality Assurance (QA) person per cluster to review the reports done by the assessors and save the results as "complete" not later than 5 days after the field work in a LG. The process of compiling the reports will be automated to ensure standardization, make the process easier, allow for deeper analysis and better publication of the results.

4.3 Reporting

Based on the above process and consultations, the LG PA team will provide a report of the results up-loaded in the OPAMs.

5 Quality Assurance and Results Verification

5.1 Spot Checks

The spot check will among other issues review a sample of LGs and their assessments, and review whether the LG PA teams are in place and operation as per TOR, duration of the field work, sampling and assessment procedures followed, working styles, and procedures. The Spot Check Teams will be composed of experienced members from the LG PA task force and will work in sub-teams.

The spot check will provide detailed reports, on the findings and observations as well as recommendations for the future assessment procedures, using a reporting format developed by the Task Force with core findings and recommendations. This will also provide observations on the weaker and strong areas of LGs performance, and input to the Performance Improvement planning.

The report from the spot check should be ready by the team leaders for the spot check teams (with input from each team member), and be presented and discussed in the LG PA Task force as well as in the FD Technical Committee.

5.2 Independent Verification of Process and Results

The purpose of quality assurance (QA) is to verify whether the process and results of the LGPA conducted by the Assessment Team(s) are valid, reliable, and hence overall credible. To achieve this the QA firm will undertake the following tasks:

- a) Participate in the training to be organized by the Office of the Prime Minister and conducted by the LG PA Task Force. The objective of the training will be to ensure that **all** team members have internalized the LG PA manual, including the rationale behind the process, the scoring and means of verification of the minimum conditions and performance measures. One of the elements that will be emphasized is the need for maintaining credibility of the assessment system and QA team members will therefore be required to sign the Code of Ethics for this role before executing the assignment.
- b) Review and verify the LG PA team composition prior to their departure to the field, against their team members (experts) indicated in the technical proposal.
- c) Prepare and submit a draft Inception Report to OPM which will present the QA findings regarding (b) above and an indicative mobilization plan, with a schedule for secondary data collection and review, amongst others.
- d) Collection and thorough review of requisite data from secondary sources at the national level as stipulated in the LG PA Manual.
- e) Sample LGs to be visited: With the guidance of OPM, progressively sample LGs per assessment cluster to be visited by the QA team, with justification for selection, for prior approval by the client. The sampling will be done progressively to allow for review of reports, discussion, and reconciliation with the assessment firms, facilitated by the Local Government Performance Assessment Task Force (LGPA TF)².

² Sample of the first half of LGs to be quality assured should be done towards the end of week 1 of the LGPA and the 2nd half after week 3 of the LGPA, subject to direction by OPM.

- f) Conduct field-based Quality Assurance of LG Performance Assessment. This will involve:
- i. Entry meeting: When commencing the LG-PA QA in each LG, the Consultant will meet/get in contact with the core management team in each LG and present the full Consultant's team, affirm itinerary and ensure agreement of the LGPA QA timeline.
 - ii. The QA team shall check whether the LGPA team mobilization in the field is identical to the one presented by the assessment firm(s) during procurement and orientation training of assessors, carried out by the Task Force and check their working process/style. If firms have presented different persons, OPM should ask them to stop the affected personnel and replace the right persons (this should be within a limited time frame or else their contract is terminated, or other contractual sanctions will be undertaken.
 - iii. Data collection from the District/Municipality and a sample of LLGs and facilities: The respective QA team will visit the sampled LGs for QA (same sample LGs as for the LG PA). **They will undertake the assessment process as per the LG PA Manual but with use of the results of the LG PA team as the starting point for reference.** The teams are expected to visit and spend two days in a Local Government to enable comparison of the results.
 - iv. Debriefing meeting/session to, seek clarifications and give the LG an opportunity to provide more information. The Consultant will strictly use a pre-determined format to present at the debrief, take minutes of the meeting and fill the Exit Form which will be signed by the CAO/TC with comments from the LG.
 - v. Compiling of the LG QA Performance Assessment Reports which will be a detailed report per LG, consolidating performance findings and scores from both the desk-based review and field work. Each QA team member shall compile the findings and up-load in the Online Performance Assessment Management System (OPAMs) using the QA format no later than 2 days after the assessment of each LG. The QA format in OPAMs will provide for reporting against the Assessment reports submitted as "complete" by the assessors, exploring the reasons for any deviations in results (if any) and with a section requiring the opinion of the QA based on their findings³. The contracted firm must have an internal reviewer of their reports before they are saved in OPAMS as "complete" no later than 1 day after the field work in a LG. The process of compiling the reports will be automated as much as possible to ensure standardization, make comparison with the LG PA reports easier, allow for a section to adduce the opinion of the QA based on the LGPA results posted thus far.
- g) Each of the QA sub-teams are expected to cover 2 sampled LGs per week, compile a report on those, with findings, and comparison of results with the LG PA team, provide narrative for reasons for any deviation, and present at a meeting convened by the LG PA Task Force to reconcile the findings with the assessment firm(s) in the following week. Based on this the IVA will meet with the Task Force to review findings and identify major deviations in results if any. The LG PA Task Force will follow up on

3 A specific format will be provided.

the deviations during the spot checks. Based on the outcome of such a meeting and spot check findings the assessment firm(s) will uphold the exercise as is, adjust where recommended or, if there are major deviations, be required to do re-assessment of LG(s) in question. Similarly, the IVA team may be requested to review original findings and evidence.

- h) Compile a synthesis report summarizing key highlights of the findings and scores for all LGs sampled, comparison with the scores of the LGPA and narrative on each indicator of reasons for deviations and providing a succinct opinion on the validity of the LG PA results. This report will also encompass a review of changes made by the LG PA, based on the findings from the IVA, and the subsequent Task Force interventions and whether these adhere with the IVA findings. This report will follow a format provided by OPM before the exercise.

6 Review, Approval, Use and Dissemination of the Results

6.1 Grievance Handling

The LGs will have a short window to submit grievances as the system has other inbuilt quality checks and balances to ensure neutrality and objectivity as outlined below.

- a) The LGs should raise issues during the exit meeting focusing on processes and evidence (and sign Exit Form);
- b) LGs will be given an opportunity to review their respective reports online (OPAMS) after the results have been approved by the LG PA Task Force;
- c) The LGs will communicate grievance(s) (if any) in writing by the CAO/TC with supporting evidence to the Secretariat of the Performance Assessment Task force, Permanent Secretary OPM within a period not exceeding 5 working days from the time when the reports have been opened for LGs to review;
- d) The LG PA Task Force will consider the grievances provide feedback to the LGs.
- e) The LG PA Task Force will request the assessment teams in writing to make any adjustments that may arise from addressing of the grievances.

6.2 Approval of results

The LG Task Force will send the final LG PA results to the Fiscal Decentralisation (FD)– TC for approval. The FD–TC will review and discuss the recommendations made by the LG PA Task Force and approve the final results of the LG Performance Assessment. Results will be shared with FD–SC comprised of the core Permanent Secretaries for the performance-based grant system (OPM, MoPS, MoFPED, MoLG, MoLHUD; MoWE, MoH, MAAIF, MoES) and the Secretary of LGFC and the political oversight committee for buy-in and information.

6.3 Synthesis Report

Based on the reports from the LG PA firm, the LG Performance Assessment Task Force with its Secretariat under OPM, will produce the synthesis report, purely based on the results up-loaded in the OPAMs.

6.4 Use of Results and Impact

The results of the assessment will be used to:

- a) Allocate part of the development grants
- a) Inform performance improvement planning

6.4.1 Use of the results to allocate part of the development grants

The allocation formulae for the performance grants will have two components:

- Component 1: Allocation drawn on a need-based formula:
- Component 2: Allocation based on the performance assessment results computed as: % of Minimum Conditions met multiplied by the results of performance measures, divided by 100 and then weighted with the basic formula, see below.

Table: Weight of the basic component and performance component as at FY 2020/21

Grant	Ad hoc/core minimum allocations	Performance Grant	
		Basic Formula %age	Performance element (% MC met X PM score/100 then weighted with the basic formula)
DDEG	N/A	50	50
Education	Costs for construction of secondary schools	50	50
Health	Costs for up-grading health centre II to III.	0	100
Water and Environment	NA	50	50
Micro-scale Irrigation	NA	60	40

Table: Factoring in of compliance with minimum conditions (“key performance measures”):

For example, if

Percentage (%) of MCs met is as	With the PM Scores being (%) – example	Then the Final Score will be (%) which must be weighted to the basic formula
100	70	70 points
75	70	52.5 points
50	70	35 points
25	70	17.5 points
0	70	0 points

The implications are:

- a. If all MCs are met, then the final score will be equal to the score from the PMs.
- b. Every MCs not met reduces the final score.
- c. If all MCs are not met, then the final score is 0 irrespective of the PM score. Therefore, the LG forfeits the performance component of the grant if it does not meet all the MCs.
- d. This system stresses the importance of MCs (and give this a significant impact) on a continuous calibrated scale, rather than a system of on/off to the entire performance component of the grant.

6.4.2 Use of results for performance improvement planning

The results of the LG PA exercise are used to support the development and implementation of (i) performance improvement plans for LGs that have performed poorly; and (ii) thematic performance improvement plans.

6.5 Dissemination of Results

The results will be disseminated through websites, (OTIMS/OPAMS) publications, and feed back to each of the LGs. The results will also be included in the GAPR. A national dissemination event will also be organised by OPM.

7 Institutional Arrangements and Timing

7.1 Institutional Arrangements

The table below shows the main tasks of each of the stakeholders in the assessment system.

Stakeholder	Indicative Tasks
LG PA Task Force	<ul style="list-style-type: none"> - Develop and review the LG PA Manual; - Training of the contracted Assessment Firm and IVA - Conduct spot checks of the LG PA exercise - Review and recommend the results for approval to the FD TC
FD TC	<ul style="list-style-type: none"> - Verifies and approve the results of the LG PA and informs FD SC
OPM (Secretariat)	<ul style="list-style-type: none"> - Coordinates and chairs the LG PA task force - Operates the OPAMs - Guiding and supervising the contracted assessment and IVA firms - Coordinates the work on the synthesis report and publication of results - Use the results in the GAPR and other M&E tools - Follow-up of actions and recommendations
MoLG	<ul style="list-style-type: none"> - Coordinates the performance improvement planning and follow-up on results
MoFPED	<ul style="list-style-type: none"> - Supports on all aspects of finance, including timely releases of funds against results - Uses the results for allocation of grants - Uses results for general LG monitoring and evaluation systems
Sector ministries including MoPS	<ul style="list-style-type: none"> - Support the LG PA and sharing of information on guidelines, support PIP, and follow-up - Use the results to explore areas where legal and institutional framework as well as guidance should be strengthened - Develop mitigating measures to enhance performance
LGs	<ul style="list-style-type: none"> - Provide information for the LG PA - Use results to address capacity gaps and performance improvements - Follow-up on results, and develop PIPs
OAG	<ul style="list-style-type: none"> - Provides audit opinion of LGs to be used for the LG PA
Private assessors (teams)	<ul style="list-style-type: none"> - Conduct neutral and objective assessment
Private IVA	<ul style="list-style-type: none"> - Provide quality assurance of the results

7.2 Timing of Activities

The bar-chart below provides a snapshot of the overall process and timing⁴.

Bar-Chart 1: Overview of the timing of the assessment of HLGs

12 Micro-scale Irrigation Performance Assessment

1. Micro-scale irrigation performance assessment will only be conducted in districts selected to receive the micro-scale irrigation grant.
2. All indicators will be assessed starting in FY 2020/21. The indicators which are not applicable during the year of assessment will be scored O. This is because:
 - a) It will provide a baseline and a basis for trend analysis.
 - b) It will not disadvantage any LG as all will score O – level ground.
 - c) The districts are supposed to be performing the functions even without the micro-scale irrigation grant
3. The results for the assessment to be conducted in FY 2020/21 and FY 2021/22 will be used for monitoring and evaluation purposes and to develop performance improvement plans but not to impact on the allocation of the grants. This is because the districts will not have received and used the grants in FY 2019/20 (assessed in 2020/21); and the grants received in 2020/21 (assessed in 2021/22) are only for complementary services. Therefore, the results of the performance assessment to be conducted in FY 2022/23 will be the first to be used to impact on the allocation of grants for FY 2023/24. This is because the LGs would have received and used the capital development grant for FY 2021/22. The table below provides an overview of how the performance assessment and use of the results will be phased in relation to the flow of funds and implementation of activities in the 40 phase 1 districts. The same principles will apply when micro-scale irrigation grant is replicated countrywide.

ANNEXES

Annex 1 Code of Ethics for the Assessment Teams

The assessment process and quality assurance under LG PA will be contracted to independent private firm(s). The contracted private firm(s) will have to adhere to the following standards/terms which should be part of the contract documents.

1. Fielding of competent team members:
 - Staff conducting the assessment should be those submitted for evaluation during the bidding process.
 - The staff should demonstrate that they have proven capacity and experience in the respective areas of expertise as presented in their respective CVs;
 - The staff should be neutral and without conflict of interest in terms of LG to be reviewed.
2. Team objectivity, neutrality, and integrity during the assessment process:
 - The team members should adhere to the assessment process, procedures and scoring as prescribed in the LG PA Manual.
 - The team members should not get involved in any sort of corrupt tendencies/practices.
 - The team member cannot receive any payments from the assessed LGs/or related bodies/stakeholders.
 - The team members should not have (or should declare) any sort of conflict of interest in the LGs being assessed, e.g. the team member should not have been involved in work or related support to the LG in case over the past 5 years;
 - Team members are obliged to report about any irregularities related to the assessments to the client.
3. Timely and quality production of the reports
 - The team members should produce the report as per the provided formats.
 - The team members should provide the report within the provided time.
 - The team members should provide comprehensive and accurate information

In case of failure to comply with the provisions of this code of conduct, the assessment team or any member thereon shall be subject to all/or some of the following disciplinary measures:

1. Additional work and reassessments: Teams may be required to conduct follow-up work on issues which are not sufficiently clear, or where there are cases of contradiction between the assessments and the quality assurance.
2. Deduction in the contract value for the assessments: In severe cases, where there are clear instances of wrong/flawed results, this may lead to deductions in the payments for the work conducted.
3. Blacklisting from future assessments: This will happen if there are strong reasons to believe that assessments lack quality, are flawed, or manipulated.
